

Understanding of the Present State of Subject Retrieval and Looking for the Future Direction: Consideration of Some Views Given by Those Classificationists Who Participated in the 1957 Dorking Conference [in Japanese]. Keiichi Kawamura. Tokyo, Jusionbo, 2020, 84p. (ISBN 978-4-88367-345-2). Price: 1,000 yen.

Summary

The First International Study Conference on Classification Research held in Dorking, England in May 1957 brought about a breakthrough of classification theory and promoted further research and development of faceted classification. But what has been dominant in the information retrieval world is post-coordinate indexing system based on the principle of simple matching and simple coordination of words or terms. In addition to the decline in quality of retrieval, library and information science (LIS) is now faced with the problem of a paradigm shift caused by the following three factors: (1) the likely increase in general accessibility to information sources embracing all fields of knowledge because of the development of the Internet; (2) the popularization of online retrieval by users themselves; and (3) the need of fewer classifiers than before due to central classification services. Describes that a few of those classificationists who participated in the Dorking Conference pointed two alternative ways of aiding users in retrieval: (a) Eric Coates and Jack Mills suggested making good use of completely faceted new general classifications; and (b) Brian Vickery suggested the development of search interface software incorporating the technique of artificial intelligence (AI).

Table of Contents

1. Introduction	7
2. International Study Conference on Classification Research [of FID/CR]	8
3. Significance of the [1957] Dorking Conference	10
3.1 Conference participants	10
3.2 Conference proceedings	11
3.3 Landmark in classification research	12
4. Research and Development of Faceted Classification	14
4.1 Special classifications	14
4.2 Notation in classification	14
4.3 General classifications	16
4.3.1 Unachieved NATO classification [that resulted in PRECIS]	
4.3.2 Revival of Bliss Classification [BC2]	
4.3.3 Switching language for UNISIST programme [BSO]	
4.3.4 BC2 and BSO	
5. Commemorative Publication and Proceedings of the [1997] London Conference	

.....	25
5.1	
Outline of commemorative publication and conference proceedings	25
5.2	
Understanding of the present state of subject retrieval	26
5.2.1 Jack Mills' view	
5.2.2 Eric Coates' view	
5.2.3 Derek Langridge's view	
5.2.4 Cyril Cleverdon's view	
6. Decline of Quality in Retrieval and Decline of Classification30
6.1	
Warnings put forth by the wise in Japan	30
6.2	
The 30-year rule and conditions in USA	31
6.3	
Planes of subject analysis [in Ranganathan and Coates]	32
6.4	
Computer and plane of subject analysis	33
6.5	
Indispensable functions overlooked	34
6.5.1 Classification as the basis of vocabulary control	
6.5.2 Classification as the basis of all kinds of indexing languages	
6.6 Causes of decline of classification	35
7. Vickery's Change of Direction and Slant to Information Science	37
7.1 Reminiscence in the [1997] commemorative publication	37
7.2 Concluding remarks in proceedings of the [1997] London Conference	38
7.3 Course of Change of Direction	38
7.3.1 Remorse for the CRG declaration	
7.3.2 Secession from the CRG	
7.3.2 Ascetic neutrality	
7.3.3 Practical works with Alina Vickery	
7.4 Development of AI system for aiding users in retrieval	41
7.5	
Practice of intelligent interface	43
7.5.1 Knowledge and skills required for interface	
7.5.2 Knowledge structure and representation utilized for interface	
7.5.3 Vickery's roles [in the development of Tome Searcher]	
7.6	
Problems that face Vickery and information science	48
8. New Roles of Classification51
8.1 From indexing language to information language: reconsideration of the CRG declaration	51
8.2 Classification as a search aid	52
8.3 Classification as a teaching aid	53

8.4	Library classification as a discipline [Title of Ranganathan's address at Dorking]	54
9.	Paradigm Shift in LIS and Looking for New Direction	57
9.1	Two alternative ways	57
9.2	Problems to be solved in connection with new direction	58
10.	Summary of Discussions	60
11.	Conclusion	62
	Acknowledgement	64
	Literature cited	65
	Author's	75
	Editor's postscript	76
	Index	78
